SUMMARY

5th-period Computer Engineering student seeking backend development opportunities. Solid foundation in C++, Java, and Python, with hands-on experience in object-oriented programming, SQL databases, and embedded systems. Analytical and proactive professional combining academic logic skills with practical market experience in data analysis and hardware integration within the energy efficiency sector.

TECHNICAL SKILLS

- **Languages:** Java, C/C++, Python, SQL, JavaScript (Basic)
- **Tools & Frameworks:** Git, GitHub, Spring Boot (Learning), SFML, MATLAB
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures, Algorithms, Relational Databases

EXPERIENCE

Energy Efficiency Project Assistant | ELETRON energia, Curitiba-PR

2024 – Present

- Assist in the execution of Energy Efficiency Programs (PEE), focusing on HVAC systems, motor inverters, and PV plants.
- Process and analyze consumption data to build Cost-Benefit Ratio (RCB) models and Measurement & Verification (M&V) reports.
- Draft detailed regulatory documentation for major energy utility companies.
- Perform fieldwork including the installation of energy meters, VFDs, and assembly of control panels based on multi-wire diagrams.

Calculus II Teaching Assistant | UTFPR, Curitiba-PR

Mar 2025 – Jul 2025

- Provided academic support and problem-solving guidance for complex mathematical concepts.
- Conducted review sessions to clarify analytical doubts for engineering students.

FEATURED PROJECTS

EduBra: Braille Educator Device (Embedded System)

- Developed an assistive system using Python and a Raspberry Pi 4 to convert digital text into tactile braille representations.

- Implemented Wi-Fi communication, multi-threading, and hardware interrupts to control servomotors and audio feedback simultaneously.
- **GitHub:** github.com/Arthur-Heberle/Oficinas_1

Brasimore: 2D Platformer Game

- Developed a 2D platformer using C++ and the SFML library.
- Applied Object-Oriented Programming principles, design patterns, and file management techniques.
- **GitHub:** github.com/Arthur-Heberle/Brasimore

EDUCATION

Bachelor of Computer Engineering | Universidade Tecnológica Federal do Paraná (UTFPR)
5th Period – Expected Graduation: Dec 2028

LANGUAGES

- **Portuguese:** Native
- **English:** Advanced (Fluent in technical listening and speaking)
- **Italian:** Intermediate
